Question Number : 2 Question Id : 640653388699 Question Type : MCQ Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 6

Question Label : Multiple Choice Question

1. (1 point) In K-means, the number of clusters (K) changes as the algorithm reaches to convergence.

   A. True

   B. False

2. (1 point) A uni-variate Gaussian distribution is completely defined by the following parameters.

   A. mean, variance

   B. median, covariance

   C. mode, variance

   D. mode, covariance

3. (1 point) K-Means will always find the global minimum.

   A. True

   B. False

4. (3 points) Consider the set of training data below, and two clustering algorithms: K-Means and a Gaussian Mixture Model (GMM) trained using EM. Will these two clustering algorithms produce the same cluster centers (means) for this data set? Explain why or why not.

Options :

6406531291956. ✔ I have written answers on the answer sheets

6406531291957. ✖ Not applicable

Sub-Section Number :	3
Sub-Section Id :	64065355944
Question Shuffling Allowed :	Yes

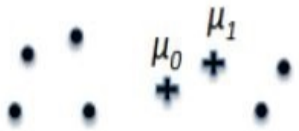
Question Number : 3 Question Id : 640653388700 Question Type : MCQ Is Question

Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 11

Question Label : Multiple Choice Question

5. (3 points) Assume there are two Gaussian components in the GMM; μ_0, μ_1, σ_0 and σ_1 define means and variances of these two components, π_0 and $(1-\pi_0)$ denote the mixture proportions of the two Gaussians (i.e. $p(x) = \pi_0 N(\mu_1, \sigma_1) + (1-\pi_0)N(\mu_2, \sigma_2)$).



(a) (1 point) Draw on the figure the directions in which μ_0 and μ_1 will move during the next M-step.

(b) (2 points) Will the estimate of π_0 increase or decrease on the next EM step? Explain your reasoning in one sentence.

6. (5 points) We saw two approaches to solve the sequence prediction problem: greedy and viterbi. Consider a weather sequence prediction problem, assuming first-order markov chain. Given that Sunny weather was observed on Day-0, compute the best possible weather forcast sequence for the next three days using 1) greedy approach, 2) viterbi approach.

Hint: For viterbi keep a track of path taken to calculate $\gamma_A(B)$, where $\gamma_A(B)$ denotes maximum probability of reaching state A at time step B.

		Today		
		Sunny	**Cloudy**	**Rainy**
Yesterday	**Sunny**	0.5	0.375	0.125
	Cloudy	0.25	0.125	0.625
	Rainy	0.25	0.075	0.675

7. (3 points) We saw two approaches for vector quantization, namely: k-means & Linde-Buzo-Gray Algorithm (LBG). Explain in detail the clustering mechanism used in these two algorithms, highlighting differences in their approach.

8. (1 point) For perfect reconstruction of a bandlimited signal, the sampling frequency must be _____.

   A. equal to twice the maximum frequency

   B. greater than equal to twice the maximum frequency

   C. lesser than equal to twice the maximum frequency

   D. none of the above

9. (3 points) For each of the following discrete time system, comment upon the following system properties (1) linear/non-linear, (2) time-invariant/time-variant, and (3) causal/anti-causal.

   (a) (1.5 points) $y[n] = nx[n]$

   (b) (1.5 points) $y[n] = e^{x[n]}$

10. (1 point) Any point in a 3-D space can be represented as a _____ combination of its basis functions.

11. (1 point) Let $f_X(x)$ be the probability distribution function for random variable X then

$$\int_{-\infty}^{\infty} f_X(x)dx = ?$$

   A. 1

   B. ∞

   C. 0

   D. none of the above

12. (1 point) The Gaussian curve is always symmetrical about _____.

   A. 1

   B. 0

   C. standard deviation

   D. mean

13. (1 point) Psychophysical equivalent of frequency is _____.

Currently, a company is using a layout which consists of 10 workstations. 200 cakes are baked in a day on this layout. A typical day consists of a single shift which runs for 8 hours. The cake baking process consists of 10 activities (the information is provided in the table below). Then answer the given subquestions

Activity ID	Activity Description	Activity Time (in seconds)	Preceding Activities
A	Prepare baking pans	20	
B	Make ingredients to room temperature	10	
C	Preheat Oven	60	
D	Stir ingredients together	40	A, B
E	Baking	20	C, D
F	Chocolate base pasting	5	E
G	Layer pasting	5	F, E
H	Icing	15	G
I	Cherry placing	5	H
J	Packing	5	I

CASE INCIDENT

Choosing Your Battles

There are situations in which too little conflict can be a problem. Some level of task conflict early in the process of formulating a solution can be an important stimulus to innovation. However, the conditions must be right for productive conflict. In particular, individuals must feel psychologically safe in bringing up issues for discussion. If people fear that what they say is going to be held against them, they may be reluctant to speak up or rock the boat. Experts suggest that effective conflicts have three key
characteristics: they should (1) speak to what is possible, (2) be compelling, and (3) involve uncertainty.

So how should you “pick a fight?” First, ensure that the stakes are sufficient to actually warrant a disruption. Second, focus on the future, and on how to resolve the conflict
rather than on whom to blame. Third, tie the conflict to fundamental values. Rather than concentrating on winning or losing, encourage both parties to see how successfully
exploring and resolving the conflict will lead to optimal outcomes for all. If managed successfully, some degree of open disagreement can be an important way for companies
to manage simmering and potentially destructive conflicts. Do these principles work in real organizations? The answer is yes.

CASE INCIDENT

Doing My Own Thing

Rita Lowe has worked for the same boss for 11 years. Over coffee one day, her friend Sara asked her, “What is it like to work for old Charlie?” Rita replied, “Oh, I guess it’s okay. He pretty much leaves me alone. I more or less do my own thing.” Then Sara said, “Well, you’ve been at that same job for 11 years. How are you doing in it? Does it look like you will ever be promoted? If you don’t mind me saying so, I can’t for the life of me see that what you do has anything to do with the operation.” Rita replied, “Well, first of all, I really don’t have any idea of how I am doing. Charlie never tells me, but I’ve always taken the attitude that no news is good news. As for what I do and how it contributes to the operation around here, Charlie mumbled something when I started the job about being important to the operation, but that was it. We really don’t communicate very well.”

Question Label : Multiple Choice Question

Hayat and Didem were key members of a project team headed by Murat. Hayat was technically competent and understood the project requirements very well, but lacked self-confidence. Didem, on the other hand, was very confident but lacked technical experience and expertise. As Murat was required to take over another project immediately, Hayat was selected as project leader, but Murat continued to devote 20% of his time to this project. After 6 to 7 weeks of taking charge, Hayat begins to feel that she requires some help with her leadership style as the project is getting

behind schedule. Murat decides to coach her using a collaborative style. Which of the following is the most appropriate approach?

Options :

6406531292095. ✖ On the basis of his observations, Murat diagnoses Hayat's problem of lack of assertiveness. He points out this problem and gives her some tips on how to enhance her assertiveness.

6406531292096. ✖ Murat shares the personal experience he had faced and solved such problems even when he was much younger and less experienced.

6406531292097. ✖ Murat points out that Hayat is ultimately responsible for ensuring project performance and outcomes, and so should come up with solutions rather than problems. He does this with the intention of putting pressure on Hayat to get over her timidity.

6406531292098. ✔ Murat sits together with Hayat to generate alternative solutions and encourages Hayat to consider the consequences of each of those alternatives.

Question Label : Multiple Choice Question

Halime has worked very hard on developing an innovative new approach for carrying out a key project. This needs to be approved at a higher management level in the organization, but senior managers have so far given the idea no more than cursory attention. They have reluctantly agreed to Halime's request for a meeting to discuss this matter. But Halime has just found out that other agenda items have been subsequently included in that meeting, and so she is likely to get just 10 minutes to present her approach. She feels quite sure that senior managers don't feel inclined to change the existing methods, and are merely going through a ritual by making a short time allocation. She approaches you in an emotional and demoralized state. You have been her supervisor before. Though you work in a different part of the organization, she comes to you to be coached once in a while. What will you tell her?

Options :

6406531292115. ✖ You draw her out so that she can articulate her innovative idea in a clearer manner. Your purpose will be to ensure that she does not sound vague in her meeting and does not get misunderstood.

6406531292116. ✖ You agree with her that senior managers are indeed oriented to the status quo and that while she can make efforts, she should not expect results to necessarily flow from those efforts.

6406531292117. ✔ You help her see that she should perceive her role as that of an ace salesperson selling an idea to senior managers. You brainstorm with her some effective steps such

as to do that so that she approaches the meeting in a calm, confident, optimistic and determined state.

6406531292118. ✖ You point out that she may have already lost half the battle by getting demoralized. You point out to her that limiting beliefs and assumptions would be the wrong way of looking at the problem or challenge.

A test case is said to have passed when which of the following holds?

Options :

6406531292193. ✖ The actual output is different from expected output but there is no error

6406531292194. ✔ The actual output is the same as the expected output.

6406531292195. ✖ The software produces an output successfully upon giving an input.

6406531292196. ✖ There is a message that there is no error from the program

The control flow graph given above represents which of the following codes? In the graph above `u` is the initial node and `x` is the final node.

Options :

6406531292199. ✖

```
y=0;
if(y>=x)
{
  x=2*x
}
```

6406531292200. ✖

```
if (y=0)
{
  while(y>=x)
  {
    x=2*x;
  }
}
```

6406531292201. ✔

```
y=0;
while(y<x)
{
  x=2*x;
}
```

6406531292202. ✖

```
if (y=0)
{
  while(y<x)
  {
    x=2*x
  }
}
```

Question Label : Multiple Select Question

Consider following classes for the code base to be tested, and a test class.

```
//code base
public class StringProcessor {
  String word;
  public StringProcessor (String w) {
    word = w;
  }
  public String revStr() {
    String rstr = "";
    for(int i = 0; i < word.length(); i++)
      rstr = word.charAt(i) + rstr;
    return rstr;
  }
}

//test class
import static org.junit.Assert.*;
import org.junit.Test;

public class TestStringProcessor {
  @Test
  public void testCase1() {
    StringProcessor sp = new StringProcessor("test");
    assertEquals("tset", sp.revStr());
  }
  @Test
  public void testCase2() {
    StringProcessor sp = new StringProcessor("test");
    assertNull(sp.revStr());
  }
  @Test
  public void testCase3() {
    StringProcessor sp = new StringProcessor("test");
    assertFalse(sp.revStr().equals("tset"));
  }
  @Test
  public void testCase4() {
    StringProcessor sp = new StringProcessor("test");
    assertNotNull(sp.revStr());
  }
}

```

Identify the test case method(s) that fail(s) on the code base.

Options :

6406531292149. ✖

```
testCase1()
```

6406531292150. ✔

```
testCase2()
```

6406531292151. ✔

```
1 testCase3()
```

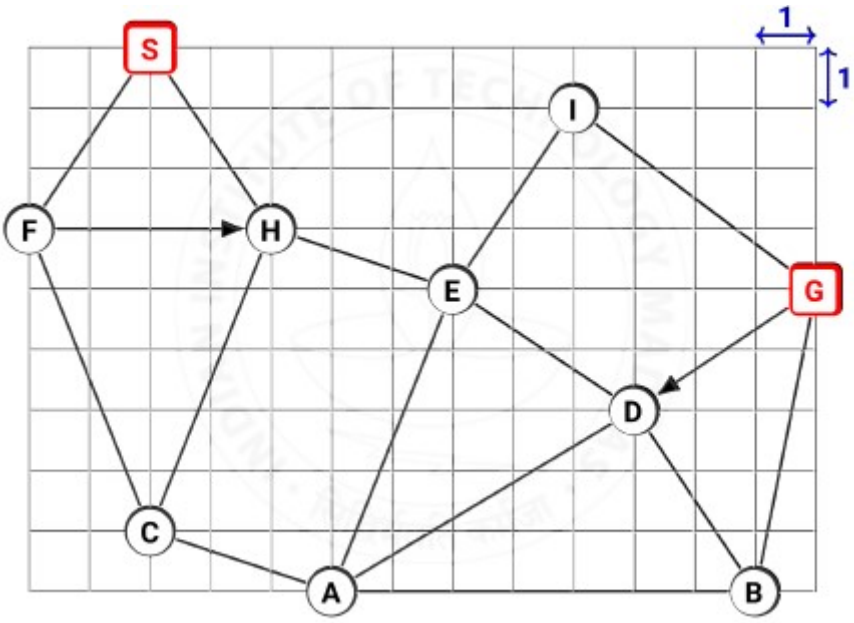
SEARCH

The figure shows a map with several locations on a grid where each tile is 1x1 in size. The locations are at grid points and are connected by either two-way edges (shown as undirected edges) or one-

way edges (shown with one arrowhead).

Take S as the start node and G as the goal node. The MoveGen function returns neighbours in alphabetical order. The RemoveSeen procedure removes neighbours already present in OPEN/CLOSED lists.

Use Manhattan distance when needed



When we say a node is inspected/expanded/refined it means: the node is picked up from OPEN, and goal test is called, if goal test fails then MoveGen is called and, depending on the algorithm, the neighbours are selectively placed in OPEN.

Based on the above data, answer the given subquestions.

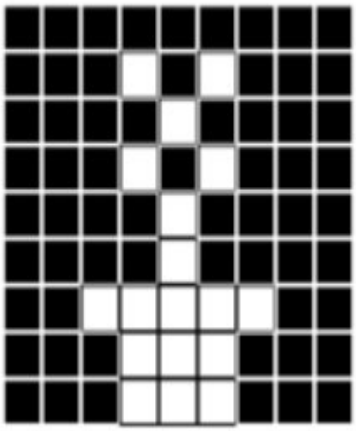
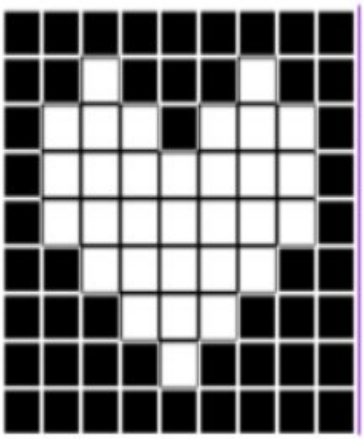
The binary images shown below are of size 9×9. Black represents 0 and white represents 1. The object is represented by (a group of) white squares



Class: 0



Class: 1

Based on the above data, answer the given subquestions.

Sub questions

Question Number : 108 Question Id : 640653388810 Question Type : MSQ Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 6

Question Label : Multiple Select Question

Suppose that the inputs are generated by shifting the object in the image by maintaining the relative positions of the white squares (note that even after shifting the entire object will still remain in the image). Suppose further that we use the McCulloch- Pitts neuron to recognize the images. Recognizing here means that the neuron outputs 0 if the input image is from class 0, and it outputs 1 for the images from class 1. The image is resized as a vector by concatenating rows. Therefore, the input $x \in \mathbb{R}^{81}$. Which of the following thresholds (θ) achieves this task with zero classification error?

$$\hat{y} = \begin{cases} 1, & \text{if } \sum_{i=1}^{81} x_i > \theta \\ 0, & \text{otherwise} \end{cases}$$

where, $\hat{y}$ is the output from the MP neuron.

Options :

6406531292265. ✔ $\theta = 25$

6406531292266. ✖ $\theta = 81$

6406531292267. ✖ $\theta = 31$

6406531292268. ✔ $18 \leq \theta < 31$

6406531292269. ✖ $18 \leq \theta \leq 31$

6406531292270. ✖

Shifting the object in an image might influence the final θ value. Therefore, not possible to fix a threshold value which will lead to zero classification error.

Question Number : 109 Question Id : 640653388811 Question Type : MCQ Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks : 6

Question Label : Multiple Choice Question

The vector form of the image is a data point $\in \mathbb{R}^{81}$. Therefore, all the inputs that are generated by shifting the object in the image, by maintaining the relative positions of the white squares, are also data points $\in \mathbb{R}^{81}$. Some of those data points will belong to class 0 and some belongs to class 1. Then, the statement that the data points are not linearly separable is

Options :

6406531292271. ✖ TRUE

6406531292272. ✔ FALSE

6406531292273. ✖ Not possible to decide

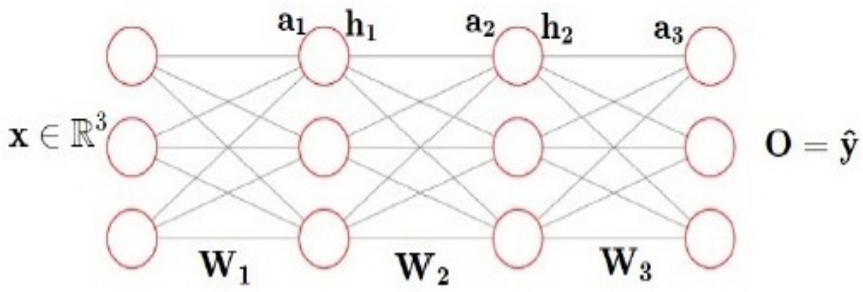
Question Label : Comprehension

Consider a feed forward neural network shown below where, $\mathbf{x}$ is an input vector. The vectors a_l, h_l correspond to the pre-activation and activation at layer l. The matrices $\mathbf{W_1}$ are weights that connect neurons from layer $l-1$ to layer l. Finally, the vector $\mathbf{o}$ is an output vector $\mathbf{o} = \mathbf{h_3} = \hat{y}$. All neurons in the hidden layer use logistic activation function, and neurons in the output layer use softmax function. Further, the network minimizes cross entropy loss.



Based on the above data, answer the given subquestions.
