Question Label : Comprehension

Read the following passage and answer the given subquestions:

On weekends, there is hardly any elbow room on Shanghumugham Beach in Kerala's capital, Thiruvananthapuram. The smell of roasted corn hangs in the air, vendors mill around the walkway that leads to the beach, families lounge around a 35m-long sculpture of a reclining naked woman — 'Jalakanyaka' by Kanaayi Kunhiraman — that seems to strain against Kerala's conservative ethos yet has come to be one of the most recognised landmarks in the city. It is a familiar beach scene.

The only problem is — there isn't much beach left.

"Every year, I feel the sea is drawing closer," says Indu, a 44-year-old Thiruvananthapuram resident who has been coming to Shanghumugham since her childhood. "The beach is so much smaller than it used to be. We would come here to get away from the congestion in the city, and now look how congested the beach has become."

She points to a row of fishing boats lined up along a part of the shore usually reserved for people. The boats were moved after vast tracts of the Shanghumugham shoreline were eroded following Cyclone Ockhi, which hit the Kerala coast in December 2017. A nearby road, which runs parallel to the beach, bears testimony to Ockhi's fury — rope and traffic cones cordon off the traffic from long sections of the road that were washed away by the waves.

Even now, the waves are visibly rough — but they do not deter visitors. Beach-goers play a game of racing back to the shore before the water reaches their ankles, laughing aloud when the wave beats them to it. Others try to venture into the water, holding hands with their friends but lose balance when the wave pulls back into the sea. The whistles of coastguards pierce the air, instructing the crowds to move away from the water. Families with toddlers are turned away from the water.

—Rihan Najib, *The Hindu Business Line*

Study the information carefully and answer the given subquestions:

Zaitoon, a multi cuisine restaurant stays open every Monday to Saturday but is closed on all

Sundays. In every week, lunch is served only on Monday, Tuesday and Friday. On Wednesdays, Thursdays and Saturdays, just dinner is served. The restaurant's floors are polished and plants are watered only on these six days, according to the following schedule:

- Plants are watered two days each week, but never on consecutive days and never on the same day that floors are polished.
- Floors are polished on Monday and two other days each week, but never on consecutive days and never on the same day that plants are watered.

Correct Marks : 0

Question Label : Multiple Choice Question

Instructions:

- There are some questions which have functions with discrete valued domains (such as day, month, year etc). For simplicity, we treat them as continuous functions.
- For NAT type question, enter only one right answer even if you get multiple answers for that particular question.
- Notations:
 - \mathbb{R} = Set of real numbers
 - \mathbb{Q} = Set of rational numbers
 - \mathbb{Z} = Set of integers
 - \mathbb{N} = Set of natural numbers

Options :

6406531189921. ✓ Useful Data has been mentioned above.

6406531189922. ✗ This data attachment is just for a reference & not for an evaluation.

Consider the function $f(x) = 5|x| - 20$

Options :

6406531189939. ✓ Slope of the function $f(x)$ at every point is -5 for $x < 0$.

6406531189940. ✓ The minimum value of $f(x)$ is -20 .

6406531189941. ✓ The y -intercept of $f(x)$ is -20 .

6406531189942. ✗ The minimum value of $f(x)$ is 0 .

Question Label : Short Answer Question

You have been closely monitoring your bike's mileage recently. Here is a table showing two rows representing the amount paid for fuel(in ₹) and the corresponding mileage (in Km). Consider y to be the amount paid and x to be the corresponding mileage in Km. You have noted down the distance travelled each time when the fuel meter falls back to a fixed reference mark and predicted that the equation of the best fit line as $y = 5x - 22$. What will be the value of SSE w.r.t the best fit line?

Recall: SSE is $\sum (y_{\text{predicted value}} - y_{\text{actual value}})^2$

Amount paid (in ₹)	80	50	60	100	50
Distance (in Km)	20	15	16	25	14

A ballistic missile is launched from a fighter jet flying at a height of 40 m from the ground. The missile hits the tank which is present on the ground, shown in figure. The function $h(t) = -2t^2 + 16t + 20$ represents the height (in meters) of the missile after t seconds.

Assume the dimension of the tank and the fighter jet is negligible.

Figure: M1G3T5-2

Find out the maximum height(in meters) attained by the missile.

On an average, a video lecture in our online degree course has 200 views on the same day that it is posted. It is verified that the total number of views increases exponentially according to the function $y = 200 \times 5^{0.1t}$, where t represents the number of days since the video was posted ($t = 0$ on the day of posting the video). How many days does it take for 1000 people to view the video?

Consider a relation R defined on the set $A = \{4, 6, 8, 10, 12\}$ as $R = \{(x, y) : y = x + 2\}$.
Which among the following is(are) correct?

Options :

6406531189932. ✓ R is neither reflexive, nor symmetric and nor transitive.

6406531189933. ✓ R is an anti-symmetric relation.

6406531189934. ✗ R is an identity relation.

6406531189935. ✗ R is an equivalence relation.

Question Label : Multiple Select Question

Let $f(x) = e^{a(x^2 - 7x + 6)}$, $a \in \mathbb{R}$ then choose the set of correct options.

Options :

6406531189923. ✓ $f(x)$ will be positive for $x \in (-20, 10)$ if $a > 0$.

6406531189924. ✓ $f(x)$ will be positive for $x \in (10, 20)$ if $a < 0$.

6406531189925. ✖ $f(x)$ is a one-to-one (injective) function.

6406531189926. ✖ If $a = 1$, then $f(x)$ will have two X -intercepts.

Choose the set of correct options.

Options :

6406531189928. ✓ There is no asymptote for the function $\log(x^2 - x + 20)$

6406531189929. ✓ $f(x) = \frac{1}{x^4 + 3}$ is a bounded function.

6406531189930. ✖ The inverse of $f(x) = x^2 - 9$ is $g(x) = \pm\sqrt{(x + 9)}$

6406531189931. ✓ The domain of the function $f(x) = \frac{3}{9-x^2} + \log(x^3 - x)$ is $(-1, 0) \cup (1, 3) \cup (3, \infty)$.
